Latest work experience

2009 Senior Server Engineer, F-Secure Corporation, Helsinki, Finland

I worked for F-Secure internal IT. Primary interest was to make internal Linux servers work rock solid. In the meanwhile I also took care of IT from tickets to data centers.

2005 Software / Test Engineer, Ascom (Finland) Oy, Vantaa, Finland

I worked at Ascom Access Node product development team that produced Linux routers to be used in Finnish Defence Forces networks.

I was involved in testing, user interface design, implementation of development tools and managing software platform. I was also responsible for all IT services that development team needed.

2004 Trainee, Tellabs Oy, Espoo, Finland

I worked at Tellabs 8600 series router development team. I did product test automation using Tcl-language. I supported Linux systems and services that testing team needed.

2002 Student Assistant, Helsinki University of Applied Sciences

Designed and took in to production use Red Hat Enterprise Linux systems integrated with Novell Netware network. Took care of DNS management and made sure email service worked.

Other

2010- Finnish UNIX Users Group, Treasurer
2007-10 Finnish UNIX Users Group, Chairman of the board
